

NEW TRAIL INFORMATION AT OAK RIDGE PARK

First and foremost, a special thanks to our own staff and the Town Planning Committee for their hard work and guidance in getting the first two phases of the Oak Ridge Park Trail completed within two months' time (prior to the Middle and High School Cross Country seasons). Additionally, and most recently, thank you to the twenty-plus coaches and kids from our very own Mukwonago High School Cross Country teams (boys and girls), as they volunteered a few hours to work with Park & Rec staff on Saturday, August 15th raking and prepping the trail prior to the WIAA fall cross country season.

Oak Ridge Park is the largest park within the Town of Mukwonago in terms of land acreage (30.4 acres) and now provides the Town an opportunity, to help meet the ever-growing demand for outdoor recreational activities and contribute to making Mukwonago a more desirable place to live and visit. The trail, which is considered "challenging" is a low-impact trail that consists of local dirt, sediment, and terrain features (hills). It was designed and built for the primary purpose of providing a more immersive nature experience for local youth and families, and includes a shorter/easier loop, as well as a longer/challenging loop.

The trail is designed to be mixed-use and will be accessible to and appreciated by those participating in a variety of outdoor activities, including but not limited to bird-watching, trail running, walking/hiking, snowshoeing, etc. The looped trails within Oak Ridge Park provide families with a variety of options for activities, as parents will be able to walk or run the trails while kids participate in our organized sports programs, and children can enjoy the trails with their parents and then visit the Lions Club pavilion for a snack lunch or picnic.

An additional, challenging loop is scheduled to be added in the Spring of 2021... and signage will be added as we are actively meeting with our local Scouting groups regarding projects... Stay tuned!

IMMERSE YOURSELF IN NATURE
